

WASABI
WALLET

Wasabi Wallet was created to help Bitcoin maintain its cypherpunk roots on its path to a global reserve currency and to mitigate the inherent privacy issues of its public ledger. This is why Wasabi Wallet is an open-source, non-custodial, privacy-focused Bitcoin wallet for desktop that implements trustless coinjoin magic.

CLUES, GET THE HUNTING SATS

huntingsats.com/amsterdam

Use the word map provided to keep track of all the words you find and make sure to talk to all the organizers and partners to get hints about the recovery seed. You can also use and follow [#HuntingSats](#) for the latest news on the game.

WHAT IS HUNTING SATS?

Hunting Sats is going live at Bitcoin Amsterdam! Play the game of cracking a bitcoin wallet to win at least \$1,500 of sats. Hunting Sats is organized by Wasabi Wallet, and sponsored by Cryptosteel, Bull Bitcoin, Coinkite, Wizardsardine, Vexl, BTCPay, Trezor, Bitcoin Amsterdam and BTCTKVR. No sign up required. It's free for anyone to play anonymously.

HOW DOES IT WORK?

A bitcoin wallet was created and backed up with a standard 12-word recovery phrase. All the words from the recovery phrase are hidden in the venue. Together, these words make up the recovery seed of the wallet which is securing the prize money. Find the words, place them in the right order and get the \$1,500 bitcoin reward. Do it before anybody else beats you to it!
